WORK EXPERIENCE

LinguistHubs

Frontend Developer Intern

Jan 2025 - Mar 2025

- Collaborated with the team to **develop** and enhance the website's frontend.
- Utilized **HTML, CSS, and React** to design **responsive and user-friendly web interfaces**.
- Gained hands-on experience in implementing **UI components** and optimizing **website performance**.
- Contributed to the overall improvement of the website's **user experience** and **design consistency**.
- Applied **UI/UX design principles** to enhance the website's **visual appeal** and usability, ensuring a **seamless user experience**.
- Conducted **user research and testing** to identify areas of improvement, leading to refined **design iterations** and better **accessibility**.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

Bachelor of Technology in Information Technology - 8.67/10

Jul 2019 - Aug 2023

PROJECTS

Real Estate Research Assistant (RAG-based GenAI Application)

Tech Stack: Python, LangChain, Streamlit, ChromaDB, LLM

- Developed a **RAG-based GenAI application** to analyze real estate news and generate investment insights.
- Implemented **web scraping and document loaders** with LangChain + ChromaDB for efficient data retrieval.
- Built a **Streamlit UI** and integrated LLM for automated summarization and report generation.

E-commerce Chatbot (GenAI-based Conversational Assistant)

Tech Stack: Python, LLM (LLaMA), LangChain, ChromaDB, SQLite, Streamlit, Web Scraping

- Developed a **GenAI-powered e-commerce chatbot** supporting FAQ and product queries using **semantic routing for intent classification**.
- Built a **hybrid retrieval system** by ingesting FAQ data into ChromaDB (semantic search) and product data into SQLite, enabling accurate query handling.
- Implemented **LLM-based response generation with dynamic SQL querying**, converting user queries into structured database queries and generating human-like responses via Streamlit UI.

AI HR Assistant (Agentic AI with MCP & Tool Integration)

Tech Stack: Python, LLM, MCP (Model Context Protocol), APIs, Automation

- Developed an **Agentic AI-based HR assistant** to automate employee onboarding workflows using natural language prompts.
- Built an **MCP-based architecture** integrating multiple tools (HRMS APIs, email, ticketing systems) for task automation like onboarding, notifications, and resource allocation.
- Implemented **LLM-driven decision-making and tool orchestration**, enabling the system to interpret user intent and execute multi-step actions autonomously.

SKILLS

- **Programming Languages:** C++, Python, JavaScript
- **Frontend:** HTML, CSS, Tailwind CSS, React.js
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** SQL, MongoDB, SQLite
- **GenAI & AI:** LLMs, RAG, LangChain, ChromaDB, Prompt Engineering, AI Agents, MCP
- **Cloud & DevOps:** AWS (EC2, S3, IAM, Lambda, RDS, DynamoDB, CloudWatch, ECR, EKS), CI/CD, Serverless
- **Tools & Concepts:** Git, GitHub, OOPs, DSA, JSON, Web Scraping

ACHIEVEMENTS

- National financial literacy assessment test - Merit Certificate(12/2014).
- 5 stars on HackerRank in problem-solving, showcasing strong analytical and coding skills.
